

Created to simulate the average male: 180 cm, 80 kg (5'10", 175 lbs)
Usable on all type rides including:
standing • seating • laying down • reusable • easy to handle

Each body part has a fill/drain plug, just fill each part with water or any other material to the desired body weight.

Easy to handle because each body part can be separated from the other when moving the manikin around, plus each body part can be drained before moving.

Patent pending

Dimensions may vary

LET THE DUMMY
DO THE TESTING!
